EDUCATION

Master of Business Admin (MBA)
LeTourneau University
GPA: 4.0 | Focus: Strategic Mgmt

B.S. Electrical Engineering
Missouri S&T (Cum Laude)

Biomedical Equip Tech (BMET)
Comm. College of the Air Force

CERTIFICATIONS

- **Active Security Clearance** (Jun 2020)
- **Knowledge Mgmt** (SOUTHCOM)
- **Military Leadership** (Platoon Sergeant)
- **US Customs Border Agent**
- **Forklift/Aerial Manlift**

AWARDS

- **5 BRAVO Awards** (Honeywell)
- **2 Patent Disclosures** (Li-Fi)
- **Army Commendation Medal**
- **Army Achievement Medal**

ETHAN KUNZ

ENGINEERING PROGRAM LEADER | STRATEGIC PLANNER | ARMY VETERAN

Engineering Leader and MBA graduate with over a decade of experience bridging the gap between technical execution and strategic program management. Proven track record in National Security and Expeditionary Warfare environments, ranging from "Pulse Power" Energy Systems at KCNSC to forward-deployed military operations. Expert in workforce development, managing cross-functional teams, and executing multi-million dollar budgets. Seeks to leverage "Servant-Leader" philosophy to direct the Expeditionary Warfare Weapons & Energy System Dept (JX).

SPECIALIZED EXPERIENCE (GS-13 EQUIV)

Honeywell FM&T / KCNSC — *Kansas City, MO*

Senior Electrical Engineer & Program Lead — May 2020 – Present

Serves as Technical Lead and Acting Program Manager for Special Projects, specifically within high-voltage/pulse power energy systems critical to national security.

- **Strategic Execution:** Directs the full lifecycle of complex "Energy System" initiatives (Pulse Power), contributing thousands of direct engineering hours and managing **millions of dollars** in project execution.
- **Resource Management:** Formulates objectives and implements long-term planning for funding and human resources. Successfully justified budget allocations to executive sponsors to secure necessary funding for program expansion.
- **Expeditionary/Rapid Response (QRC):** Lead orchestrator for high-intensity Quick React Contracts (QRC). Coordinated cross-functional teams through extended operations (11-hour days) to manufacture, test, and deliver 30 full-scale systems within a strict multi-month window, meeting urgent "warfighter" needs.
- **Risk Mitigation:** Personally executed hundreds of hours of critical software testing in under two weeks to rescue a failing timeline, identifying fatal errors and saving 50% of the product deliverable.
- **Developing Others:** Acts as the primary Technical Lead for a major six-figure bi-annual training program. Coordinates over **50 internal personnel** and executive sponsors, directly influencing the development of the engineering workforce.
- **Mentorship & Training:** Successfully cross-trained **7 team members** for critical program roles by developing specific curriculum, directly addressing skills gaps and enhancing organizational capability.
- **Performance Oversight:** Supervises the technical output of junior engineers and support staff. Managed the complete design hand-off for three legacy NNSA components, ensuring all work assignments met rigorous quality standards for long-term manufacturability.
- **Process Improvement:** Architected a security-compliant local network for a CMM room, saving an estimated **thousands of labor hours** ($1M+ value) by streamlining data transfer workflows and improving organizational efficiency.

TECHNICAL EXPERTISE

Program Management & Tools

JIRA | MS Project | Budgeting | Risk Mgmt | Workforce Dev | Technical Writing

Embedded & MCUs

C++ | Python | ESP32 | STM32 | MSP TI | RP2040 | Sensor Fusion

Hardware & Systems

Altium | KiCad | LTSpice | Directed Energy | Pulse Power | High-Voltage | Weapons Integration

Industrial Controls

PLC (Siemens/AB) | HMI/VFD | FactoryTalk | SCADA | Safety Critical Systems

COMMUNITY

- **FIRST Robotics Judge** (2022–Present)
- **Hogar Nazareth** (Honduras Volunteer)
- **CFC Manager** (Fundraising Lead)

MILITARY & LEADERSHIP EXPERIENCE

US Army Reserves

MO & Honduras

Platoon Sergeant / Biomedical NCOIC (E-5) May 2011 – Jun 2021

Served 10 years in critical leadership roles, directly supervising personnel and managing assets in expeditionary environments.

- **Human Resources Management:** Served as **1st Platoon Sergeant**, maintaining accountability, discipline, and performance standards for a platoon of **22 soldiers**. Responsible for evaluating work performance, distributing assignments, and ensuring mission readiness.
- **Expeditionary Operations:** Completed a 9-month deployment to Honduras (JTF-B). Operated as the Subject Matter Expert (SME) for the U.S. Embassy, providing technical guidance on healthcare infrastructure projects.
- **Logistics & Planning:** Managed the "Biomedical Section" (8 technicians). Optimized maintenance operations by acquiring and organizing 100+ technical manuals, resulting in the award of the Army Achievement Medal.
- **Innovation:** Designed and fabricated medical support equipment during "Operation Appalachia Care," significantly increasing patient throughput and saving the unit tens of thousands of dollars (Army Commendation Medal).

ADDITIONAL RELEVANT EXPERIENCE

Nucor Corporation

Longview, TX

Electrical Projects Lead Dec 2019 – Apr 2020

- **Large-Scale Oversight:** Directed electrical modernization projects across three departments (**200 personnel**) at a massive 100,000 ton/year steel facility.
- **Systems Integration:** Managed the integration of new industrial processes and the redesign of power feed systems for heavy industrial furnaces.
